3nd year **Computer Science student**, looking for a position

A person with high motivation and responsibility, possessing a strong interest in the world of technology and software. Learns quickly, works in an orderly and structured manner, demonstrates initiative and high commitment to tasks, and has good teamwork skills alongside the ability to work independently

Education

2024-present: **Holon Institute of Technology** (HIT), Bachelor's degree in Computer Science
2017-2019: **"Kanfey Ruach" College** (as part of the Israeli Air Force Technological Pre-Military Program), Practical Electrical Engineer, holder of a Master Electrician License, graduated with highest honors
2012-2017: **Amit Dvir High School**, full matriculation certificate with specialization in electrical studies

Employment

2022-2023: **Magnus Metal Ltd** (start-up company) - Machine Operator
Operating machines, troubleshooting, maintaining operational continuity, performing routine experiments, monitoring and documenting a lot of information, analyzing data to improve and develop processes

Projects

- **ShareMap** Full-stack web application for real-time location sharing, built with Java (Spring Boot) and HTML/CSS/JS using Leaflet
  Includes JWT-based authentication, group management, and invite-code joining.
  Displays user locations on an interactive map with sharing control and PostgreSQL storage.
- **Task Manager App** I developed an Android task management app in Kotlin, implementing MVVM architecture, a Room database for local data storage, and ViewModel for lifecycle-aware state management
- **Smart Parking System - IoT Project** Developed a smart parking system simulating a real-time parking lot using IoT technologies. Implemented parking sensors and an entry gate communicating via MQTT with a central data manager for monitoring, data storage, and real-time control through a GUI
- **Intelligent Robotic Arm** for Color-Based Sorting: Developed an autonomous robotic arm project integrating AI vision (Seeed Grove Vision AI), Arduino/ESP32 for embedded control, and a React web interface for manual operation and real-time system monitoring, successfully demonstrating low-cost, AI-driven object sorting

Military Service

2019-2022: An electrician in the Air Force, certified in air conditioning systems, I served as the head of the maintenance and troubleshooting team, responsible for a team in routine and emergency situations. These tasks required meticulous attention to detail and the ability to execute under tight schedules

Technical Skills

Languages: Python, Java, Kotlin, SQL, C, C++, Linux.
Basic knowledge of 3D modeling and design processes

Languages

Hebrew – Native language
English – Good
